Steve Emerson

JavaScript and Python Development

Not all who wander are lost.

Landing Page:

+Quote in background ... only item on page at load

+Name appears, then subtitle, then footprints then Nav

+IF TIME ... animate footprints to appear in succession and disappear ... maruader's map style :)

-JRR Tolkien

About Me

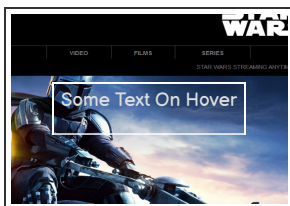

Possibly have footprints appear or animate similar to landing page

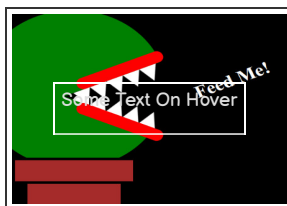

Links appear on scroll into section

Projects

Static Layout

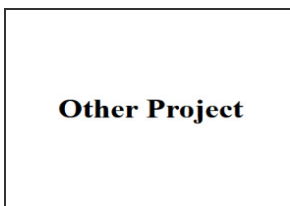

CSS Creature

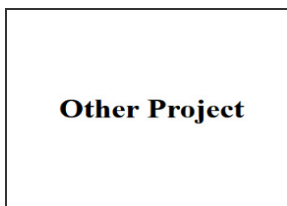

Use Bootstrap cards for each thumbnail
